

# VAN RAMPS

## SAFETY, EFFICIENCY & CONVENIENCE

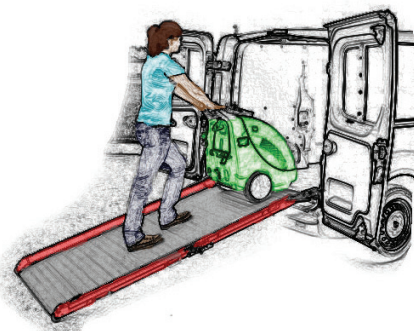

As the population of vans increases so does the challenge of loading and unloading quickly, safely and without adding undue weight to the rear of the van. If one is to choose between a rear hydraulic tail-lift, or a manual fold-out van ramp from Aeroz-Products, the decision needs to be made based on each application.

If the task is to get heavy goods in and out on a hand pallet jack, a hydraulic tail-lift is needed. However, if the load can be pushed, pulled or driven into the van or truck body, a fold out van ramp from Aeroz-Products is easier, quicker, lighter and less expensive than a quality tail-lift.

The range of Aeroz-Products Van-Ramps is gradually increasing; having started at two options, the range has now been increased to five. The models range from 2m long to 3.25m, have widths from 70cm to 125cm, include 90 or 180 degree swivel, or on the basic, no swivel at all, and Aeroz-Products stock includes capacities from 250kgs to 1800kgs.

## KEY FEATURES

- ▲ **Reduces OH&S risk**
- ▲ **Improves productivity**
  - Reduces damage to goods
- ▲ **Easily removed (if necessary)**
- ▲ **Simple manual operation**
- ▲ **Five Models**
  - Super-Light (250kgs)
  - AL Light (400kgs)
  - Light-Plus (600kgs)
  - PC (1000-1800kgs)
  - Easy (300kgs)
  - AL-Mobile (Portable – 300kgs)
- ▲ **Range of Sizes**
  - Widths 70cm-125cm
  - Lengths 2m-3.25m
- ▲ **Access Options**
  - Fixed / No swivel
  - 90 degrees swivel
  - 180 degree swivel
- ▲ **Mass weights**
  - AL & Easy (40-100kgs)
  - PC (100-150kgs)
- ▲ **Italian Made**

## TECHNICAL INFORMATION

Some applications need a simple fold-out ramp with minimal capacity. The **SUPER-LIGHT** is 85cm wide, has a capacity of 250kgs and opens out from its mounted position manually, with ease. This model can also be easily removed if needed.

For a little higher capacity the popular **AL-Light** is rated as 400Kgs. This ramp comes with a unique swivel feature, so if the ramp is not needed on a particular occasion, it can be swung out of the way; or you can remove from the van. 3 piece extended model also available.

The **Light-PLUS** has the same platform as the AL-Light, but incorporates a heavy duty mounting and swivel mechanism. The fitting kit for this type of ramp is vehicle specific. It is rated at 600Kg & available for lengths of 2.5m and 3m. It is 100cm wide.

The **PC Heavy Duty** is available with rated capacities of 1000kg to 1800kg and is ideal for large vans and small trucks. As standard it is 1.2m wide and 2.5m, 2.9m & 3.25m long, and swivels through a 180 degrees arc from its mount point.

**EASY** is ideally suited to smaller vans, or applications where a ramp is important, but not required continually. Easy is mounted at right angles to the rear, and/or side door. When released it slides out, rotates right to lock position and is then unfolded. Easy is 80cm wide and available in lengths of 2m, 2.5m and 3m. It is rated at 300Kgs.
